

Simplify benefits administration with Employee Navigator

Unum Broker Connect delivers deep integrations with leading benefits platforms to save brokers time and effort

Streamlined implementation

Get cases set up and enrolled quickly while reducing administrative effort for your team and clients.

- Onboarding teams 100% dedicated to Unum Broker Connect platforms
- Availability of standardized eligibility and plan provisions to expedite implementation
- Partner Relationship Directors available for platform consultations
- Pre-sale support and post-setup quality assurance services available

Automated plan setup

Plans are built automatically, exactly to quote, thanks to our proprietary application programming interface (API) connection with Employee Navigator.

- Loads all rates, provisions, and plan details automatically
- Minimizes need for invoice reconciliation as proper plan setup avoids billing issues
- Reduces potential for claims issues related to improperly applied eligibility rules

PLAN BUILD GUIDE

Our market-leading tool provides a step-by-step walkthrough of plan setup within Employee Navigator, saving time and ensuring accuracy.

Embedded evidence of insurability (EOI)

Reduce the EOI process from weeks to minutes with real-time decisions and no paper forms.

- Embedded EOI application leads to completion rates over 90%¹
- Approximately 85% of applicants receive an instant coverage decision¹
- EOI decisions and employee elections available inside Employee Navigator
- Application accessed via single sign-on (SSO) link
- All enrollment types supported: open enrollment, new hires and qualifying life events (QLEs).

Seamless data exchange

Utilize Employee Navigator as the system of record for your clients' employee benefits data.

- Partner Error Tool provides full member-level transparency.
- Capabilities such as Plan Design API or EOI App API ensure data accuracy.
- Weekly data connections from Employee Navigator are processed same day.
- Open, current and prior elections can be submitted simultaneously with no processing delays.
